A-6: 1 point

Correct, the answer can be found on page 5 of the Lecture Notes on Anonymity.

A-7: 1 point

Correct, the answer reasons well with the information found on page 5 - 6 of the Lecture Notes on Anonymity.

A-8: 0.8 points

Deducted 0.2 points as the answer did not mention that Mixes also have higher latency due to the delay between the input and the output of the message to/from the mix (page 4, lecture notes).

A-12: 0.5 points

The answer only mentions the two strategies and some difference between them, and no clear better choice or combination of the two. Therefore 0.5 points have been deducted.

A-13: 1 point

Correct, information can be found on page 7 of the Lecture Notes on Anonymity.

A-15: 1 point

Correct, information can be found on page 8 of the lecture Notes on Anonymity.

A-26: 1 point

Correct, the answer explains that symmetric keys (which are fast) are used after setting up a circuit. This information can be found on page 9 of the Lecture Notes on Anonymity.

A-28: 1 point

Correct, this information can be found on page 14 of the Lecture Notes on Anonymity.

Total: 7.3 points
